Education

Nov 2024 - Presence	PhD at **GenScale** team under the supervision of Karel Brinda, Dominique Lavenier and Pierre Peterlongo
2021 - 2023	European Institute of Innovation and Technology Digital Master School:
2^{nd} year, Helsinki, FI	MSc in Data Science and Business Intelligence at **Aalto University**
1^{st} year, Rennes, FR	MSc in Data Science at **Rennes University**
2018 - 2021	BSc in Computer Science at **Rennes University**

Conferences and Workshop

ECCB 2026, — Sep 2026, Geneva, Switzerland

– Link to Poster

RECOMB 2026, — May 2026, Thessaloniki, Greece

– Link to Poster

DSB 2026, Data Structures in Bioinformatics — Feb 2026, Venice, Italy

– Link to presentation

SeqBIM 2025 — Nov 2025, Nantes, France

– Link to abstract

– Link to presentation

Achievements and Awards

SFBI Travel Grant — 2026

Best Student Paper Award — Feb 2024

– Awarded for the article submitted to the BIOINFORMATICS, INSTICC conference in Rome, Italy.

Graduated Master with Highest Honors — 2023

Full Scholarship from European Institute of Innovation and Technology Master Program — 2021

Graduated Bachelor with High Honors — 2020

Research Experiences

Research Institute of Computer Science and Random Systems - IRISA — Rennes, France

Research Engineer — GenScale team — Mar 2023 - Sep 2023

– Conducted research and developed software on data mining, operations research within GENSCALE team.

– Research results presented at *conference*, and published research paper.

– Key areas: Data Mining, Data Analytics, Python, Operations Research, Bioinformatics.

Research Institute of Computer Science and Random Systems - IRISA — Rennes, France

Data and Knowledge management Department — GENSCALE team — May 2022 - Aug 2022

– Worked on binary bi-clustering using Integer Linear programming.

– Key areas: Linear Programming, Python, Pulp

Publications

Truong, Tam (Oct. 2023). "StrainMiner - Data mining and discrete optimizations for strains separation in metagenomes using long reads". MA thesis. Aalto University. URL: https://urn.fi/URN:NBN:fi:aalto-202310156354.

Truong, Tam, Roland Faure, and Rumen Andonov (2024). "Assembling Close Strains in Metagenome Assemblies Using Discrete Optimization". In: *Proceedings of the 17th International Joint Conference on Biomedical Engineering Systems and Technologies - BIOINFORMATICS*. SciTePress, pp. 347–356. ISBN: 978-989-758-688-0. DOI: 10.5220/0012320700003657.

Faure, Roland, Ulysse Faure, Tam Truong, Alessandro Derzelle, Dominique Lavenier, Jean-François Flot, and Christopher Quince (June 2026). "SNooPy: a statistical framework for long-read metagenomic variant calling". In: *Nucleic Acids Research* 54.10, gkag556. DOI: 10.1093/nar/gkag556. URL: https://doi.org/10.1093/nar/gkag556.

Software

PhyloPack Link to Git

Ordering protocol to efficiently compress and index million genomes bacterial collections.

StrainMiner Link to Git

Software for separating strains in metagenomic assemblies using ILP and Data Mining techniques.

Presentation

GenScale Master Thesis Presentation Link to Presentation

Other experiences

Enedis - France Public Electricity Network Distributor Paris, France

Full-Stack Developer Mar 2021 - Sep 2022

- Developed an task management internal web app for contract management.
- Collaborated with teams to gather requirements and employed Agile methodologies.
- Maintained documentation of system requirements and project specifications
- Key areas: Full-stack engineer, PHP, JavaScripts, MySQL.

Skills

Programming languages	Python, PHP, JavaScript, SQL, Java, Scala, OOP.
Tools	Git, Latex, GUROBI Solver, Tableau, JIRA, Figma.
Soft Skills	Strong communication, problem-solving skills, detailed-oriented and ability to work independently and in a team environment.
Languages	English (Fluent), French (Fluent), Vietnamese (native).
